AMENDMENTS TO THE CLAIMS

LISTING OF CLAIMS:

Claims 1-22 (cancelled).

Claim 23 (currently amended): A process for decoupling production of a target fermentation product from biomass production in a fermentation medium comprising:

(a) providing a recombinantly produced microorganism from the genus Bacillus that has been engineered to contain a polynucleotide sequence which encodes biosynthetic enzymes for said target fermentation product,

(b) introducing a mutation causing a biotin auxotrophy into the microorganism to control biomass production and which does not compromise the ability of the microorganism to produce said target fermentation product, and

(c) supplying the medium with an unlimited amount of substrates required for the production of said target fermentation product and with a limited amount of biotin complementing the auxotrophy;

wherein said target fermentation product is selected from the group consisting of riboflavin, pantothenic acid, thiamin, folic acid, and pyridoxine.

Claim 24 (previously presented): A process according to claim 23 wherein step (b) comprises introducing a polynucleotide comprising a deletion-insertion mutation into the genome of the microorganism to disrupt the microorganism's ability to produce biotin.

RSDOCS1\1369158

Application No.: Amendment Dated: Reply to Office Action of: 10/681,086 February 26, 2007 September 26, 2006

Claim 25 (original): A process according to claim 24 wherein the

polynucleotide comprises deletion-insertion mutations within a bioFDB gene cassette.

Claim 26 (original): A process according to claim 23 wherein the

introducing step comprises transforming the microorganism with a polynucleotide

sequence comprising a bioFDB deletion-insertion mutation.

Claim 27 (original): A process according to claim 26 comprising

transforming the microorganism with a polynucleotide sequence comprising SEQ ID

NO:1.

Claim 28 (original): A process according to claim 27 further comprising

selecting for transformation of the microorganism.

Claim 29 (original): A process according to claim 28 wherein selecting for

the transformation comprises selecting for antibiotic resistance.

Claim 30 (original): A process according to claim 29 wherein selecting for

the transformation comprises selecting for neomycin resistance.

Claim 31 (cancelled).

Claim 32 (original): A production microorganism made by the process of

claim 23.

Claims 33-40 (cancelled).
